FURNITURE

ABOUT COPELAND

Copeland Furniture has been producing wood products and furniture since 1976. We have gradually grown over the years from a one man shop to the largest employer in our small town of Bradford, Vermont producing high quality furniture.

We are surrounded by beauty. The architectural gems that line the streets in Vermont's well preserved villages inform our aesthetic and sense of proportion. The natural landscape surrounds us with beauty in the form of farmland and mountains, and is also the source of a renewable resource - solid hardwood - from which we build beautiful furniture for your home.

We know that our environment is, in many ways, very fragile. We are the beneficiaries of the strong stewardship ethic practiced and passed down by those who went before us. We hope that the next generation appreciates our stewardship and is inspired to continue the tradition.

We hope that you can see that respect for the landscape in the furniture we build for your home – timeless designs and timeless quality. We remain a 100% family owned, committed to manufacturing high quality furniture for your home.

ASTRID BEDROOM IN CHERRY

With its deeply splayed legs producing dramatic cantilevers, the Astrid Bedroom is an engineering feat that defies expectations and inspires a sense of possibility. A true platform bed, Astrid may be ordered with or without the headboard panels. Recommended mattress thickness is 8" to 12".

The Astrid Bedroom is crafted in solid cherry hardwood and Made to Order in five finishes* with a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

BERKELEY BEDROOM

A fusion of Arts & Crafts and Asian design, the Berkeley Bedroom is both sophisticated and practical. Crafted in solid cherry hardwood* with American black walnut accents, the collection features a variety of cases and a low footboard bed designed for use with a mattress only.

The Berkeley Bedroom is crafted in solid cherry hardwood* and Made to Order in five finishes** with a variety of pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Case sides are laminated with cherry veneer.

**Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

CAL KING	1-BER-15-XX	76 1/4"w x 88"l x 52"h

Space, style and function are the three main themes expressed in the Berkeley storage bed. With 4, eight-inch-deep, sub-mounted drawers, the bed provides plenty of inconspicuous storage, allowing for a roomier living environment. The Berkeley storage bed is unique, in that the drawers are mounted six inches above the floor allowing for easier access than other storage beds. The storage bed is Made to Order with a variety of pull options.

The optional nightstands are designed to allow easy access to the storage drawers.

CATALINA BEDROOM IN CHERRY

Combining the clean, unadorned lines of the International Modernists with organic and geometric forms, the Catalina Collection is suggestive of the works of America's Mid-Century Modern designers. The years following WWII were a time of uncertainty but also of great hope and progress. Designs of the period reflected that sense of hope and the promise of an ideal future. In our current period, one finds comfort and nostalgia in Catalina's retro-modern shapes and sensibilities.

The Catalina bed is low and sleek and designed for a mattress only. It is available in two heights. The Catalina Bedroom is crafted in solid cherry hardwood and Made to Order in five finishes* with a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

MANSFIELD BEDROOM IN CHERRY

The Mansfield Bedroom represents a striking combination of the familiar and the unconventional. Mitered frames support the cases producing complex facets that create visual interest and highlight the collection's solid construction.

The geometry of the black bronze ring pulls reflects that of the overall collection and is a fresh take on a traditional form. The bed, available in two heights is designed for a mattress only. It is perfectly complemented by a selection of case pieces.

The Mansfield Bedroom is crafted in solid Cherry and Made to Order in five finishes* with a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

MANSFIELD BEDROOM IN WALNUT

The Mansfield Bedroom represents a striking combination of the familiar and the unconventional. Mitered frames support the cases producing complex facets that create visual interest and highlight the collection's solid construction. The geometry of the nickel bar pulls reflects that of the overall collection and is a fresh take on a traditional form. The bed, available in two heights is designed for a mattress only. It is perfectly complemented by a selection of case pieces.

The Mansfield Bedroom is crafted in solid American black walnut hardwood with natural finish and Made to Order in a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

Mansfield Bed – 40"h Headboard – platform height 12"

MODULUXE BEDROOM

Modern Luxury for the Bedroom

Available in three unique headboard designs, a 29"H and a 35"H series, and with an array of other options. Moduluxe has the versatility to realize your vision.

The Moduluxe Bedroom is crafted in solid cherry or American black walnut hardwood* and Made to Order in six finishes** with a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Bed headboard panel is laminated with cherry or walnut veneer.

**Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

Moduluxe is Versatility.

Platform beds and cases are available in heights of either 29" or 35". A 35" high storage bed is also available.

Three unique headboard designs are available: a flat panel design, an upholstered design and a louvered "clapboard" design.

Cases are available in a wide range of configurations.

The Moduluxe Bedroom is crafted in solid cherry, or American black walnut hardwood* and Made to Order in six finishes** with a variety of knob or pull options. The finish is GREENGUARD Certified for low chemical emissions.

29" High Bed

35" High Bed

35" High Case

29" High Case

In basic functional terms the difference between the 29" high case series and the 35" high case series may be understood as the difference of one drawer - as with the three and four drawer cases shown here.

Moduluxe Headboard Designs

Panel Headboard

Simple design emphasizing the character of the wood grain itself.

Upholstered Headboard

Horizontal bolsters available in a range of covers in multiple colors as well as customer's own material.

Louvered Headboard

This "clapboard" style design emphasizes the character of the wood grain with slightly more geometric detail than the panel headboard.

29" High Beds & Nightstands

Three unique headboard designs are available: a flat panel design, an upholstered design and a louvered "clapboard" design.

*Bed headboard panel is laminated with cherry or walnut veneer.

KING	1-SLV-21-XX-STOR	78 1/2"w x 92 1/4"l x 48"h

Space, style and function are the three main themes expressed in the storage bed. With 4, eight-inch-deep, sub mounted drawers, the bed provides plenty of inconspicuous storage, allowing for a roomier living environment.

The sleigh storage bed is unique, in that the drawers are mounted six inches above the floor allowing for easier access than other storage beds. The storage bed is Made to Order with a variety of knob or pull options.

The optional nightstands are designed to allow easy access to the storage drawers.

SARAH BEDROOM IN CHERRY & MAPLE

The Sarah Bedroom is also available in a solid cherry/solid maple combination. This striking yet subtle contrast of solid hardwoods adds dimension to the Sarah Sleigh bed and case pieces.

The Sarah Bedroom is made of solid cherry and maple* and Made to Order with a variety of knob or pull options. The cases are also available in maple hardwood* and Made to Order in two finishes** with a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Case sides are laminated with maple veneer.

**Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

SLOANE BEDROOM IN OAK

With its plush upholstered headboard and soft contemporary design, the Sloane bedroom will bring comfort, class and style to your home. The Sloane Floating bed is configured for a mattress only. For a bit of soft, nighttime illumination underbed LED lighting is now available on the Sloane floating bed.

Lights are zoned left and right with independent control for each sleeper. The Sloane bed with legs can be configured for a mattress and box spring or mattress only. Upholstered items are available in a range of microsuede, fabric, UltraSuede®, UltraLeather® Original by UltraFabrics®, Upholstery Fabrics and Luxury Plains Collection by Sunbrella as well as COM (customer's own material). Please refer to the upholstery page of this catalog.

The Sloane Bedroom is crafted in solid oak hardwood and Made to Order in five finishes* with a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality. Products selected in Natural Oak display a variegated range of colors from blonde to light brown.

BATON DINING

Baton takes its inspiration from the endless flow of the infinity symbol. It is conceived of identical segments, each one resting on the next to produce impressive rigidity within a delicate, modern aesthetic. When assembled, Baton's innovative base forms a seamless ring of support with no clear beginning or end.

Baton Tables and Chairs are crafted in solid American black walnut hardwood or cherry hardwood with five finishes* or oak hardwood with five finishes*. The tables and chairs in walnut are finished with a low sheen (10 sheen) topcoat. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality. Products selected in Natural Oak display a variegated range of colors from blonde to light brown.

Marc Boudreau grew up near the sea on the Quebec eastern coast where he first learned to work with wood in his father's workshop. For reasons he can't quite explain, furniture design has always been a passion.

Throughout his career, Marc has contributed to numerous commercial successes and has received several design awards in recognition of his work. With over 25 years of experience in product design, he spent few years in the industry before establishing his own studio in Quebec City in 2002.

Since then, he has collaborated with various American and Canadian companies to create residential furniture, urban furnishings, and playground equipment.

As a designer, his greatest strength lies in his creativity. He is driven by the pursuit of simple, innovative concepts that align with his clients' philosophies and enhance their brand image.

Extension Tables

Extension tables incorporate self-equalizing, ball bearing extension glides and a single 24" self-storing butterfly leaf for single handed operation.

CATALINA DINING IN CHERRY

Combining the clean, unadorned lines of the International Modernists with organic and geometric forms, the Catalina Collection is suggestive of the works of America's Mid-Century Modern designers. The years following WWII were a time of uncertainty but also of great hope and progress. Designs of the period reflected that sense of hope and the promise of an ideal future. In our current period, one finds comfort and nostalgia in Catalina's retro-modern shapes and sensibilities.

The Catalina Dining Room is crafted in solid cherry hardwood and Made to Order in five finishes* with a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

ENTWINE DINING

Let your dining room make a statement. This striking Entwine Dining Table has been designed to reimagine traditional forms and style idioms to create compelling visual focal points wherever it is used. The Tables are crafted in solid American black walnut hardwood or cherry hardwood with five finishes* and topped with clear tempered 15 mm glass (glass tops are imported) or 12 mm sintered stone (stone tops are imported) in two color options. The tables in walnut are finished with a low sheen (10 sheen) topcoat. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

EXETER DINING IN CHERRY

Exeter dining is a striking marriage of isometric tension and modern design. Extension Tables incorporate self-equalizing ball bearing glides and can be ordered with either one or two self-storing butterfly leaves to seat up to twelve.

The Exeter Dining Room designed by Carl Thomson is crafted in solid cherry hardwood with five finishes*. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

Carl Thompson trained and graduated as an Industrial Designer. He has worked for some of the most respected names in modern design including Eliot Noyes, Walter Dorwin Teague, and Henry Dreyfuss. Over the course of his career he has designed a broad range of products with a particular emphasis on aircraft interiors, rapid transit vehicles, and industrial vehicles. In each case, seating is an elementary and important piece. That experience applies to furniture design, a continuing interest. He believes design is the synthesis of materials, methods, art, and science producing attractive, comfortable, useful objects and furnishings. This approach has led to domestic and international recognition.

Extension Tables

Extension tables incorporate self-equalizing, ball bearing extension glides and a single 24" or double 20" (each) self-storing butterfly leaves for single handed operation.

EXETER DINING IN WALNUT

Exeter dining is a striking marriage of isometric tension and modern design. Extension Tables incorporate self-equalizing ball bearing glides and can be ordered with either one or two self-storing butterfly leaves to seat up to twelve.

The Exeter Dining Room designed by Carl Thomson is crafted in solid American black walnut hardwood with natural finish. Dining items in walnut are finished with a low sheen (10 sheen) topcoat. The finish is **GREENGUARD Certified** for low chemical emissions.

Carl Thompson trained and graduated as an Industrial Designer. He has worked for some of the most respected names in modern design including Eliot Noyes, Walter Dorwin Teague, and Henry Dreyfuss. Over the course of his career he has designed a broad range of products with a particular emphasis on aircraft interiors, rapid transit vehicles, and industrial vehicles. In each case, seating is an elementary and important piece. That experience applies to furniture design, a continuing interest.

LISSE DINING

In a style that can be described as organic minimalism, Lisse exhibits graceful curvature and smooth, flush joints throughout. With its molded, sculptural lines, Lisse is a study in subtle complexity. The Lisse Dining Room is crafted in solid cherry or American black walnut hardwood and Made to Order in six finishes*. Dining items in walnut are finished with a low sheen (10 sheen) topcoat. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

CATALINA OCCASIONALS

Catalina occasionals include a sofa table, coffee table, side table and end table.

The Catalina Media and Occasional pieces are crafted in solid American black walnut hardwood with natural finish and Made to Order with a variety of knob or pull options. The Side Table and Oval Coffee Table are also available in Oak. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality. Products selected in Natural Oak display a variegated range of colors from blonde to light brown.

WE USE CertiPUR-US® CERTIFIED FOAM

CertiPUR-US® comes with Comfort and Confidence. Certified flexible polyurethane foams meet CertiPUR-US® program standards for content, emissions and durability, and are analyzed by independent, accredited testing laboratories.

CertiPUR-US® approved foams are:

- ☑ Made without formaldehyde
- ☑ Made without ozone depleters
- ☑ Made without phthalates regulated by the U.S. Consumer Product Safety Commission
- ☑ Made without mercury, lead and other heavy metals
- ☑ Low VOC (volatile organic compound) emissions for indoor air quality (less than 0.5 parts per million)
- ☑ Screened for relevant chemicals, including flame retardants, that are classified as carcinogens, mutagens or reproductive toxins and are harmful to human health

Administered by a nonprofit organization, CertiPUR-US® is a certification program for flexible polyurethane foam used in bedding and upholstered furniture. For technical criteria and a list of participating companies, visit: www.certipur.us

INVIGO SIT-STAND DESKS

Invigo is a highly configurable series of sit to stand desks that can be specified in a range of sizes and finishes. Built on a high quality three-stage, dual motor lift base with three programmable positions, Invigo desks raise from 25" to 51" inches in height. Desks may be fitted with a variety of wire management, storage, decorative and computer accessories. Desktops and all wooden elements are manufactured in Vermont with imported electronic lift base, hardware and accessories.

The Invigo Sit-Stand Desks are crafted in solid cherry or solid walnut hardwood and Made to Order in several finishes*. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

Why should I choose a sit-stand desk?

- A typical desk worker spends from 9 to 12 hours a day sitting. Add time spent sleeping and that's up to 19 sedentary hours every day! ^{1,2}
- A sedentary lifestyle dramatically increases risk of diabetes, obesity, heart disease, chronic pain, depression and a host of other illnesses. ²
- Exercise alone cannot fully offset the harmful effects of a sedentary lifestyle. Even for those who regularly exercise, prolonged periods of sitting can reduce circulation, introducing risk factors for a number of diseases. ^{3, 4}
- Incorporating periods of standing into your daily routine can reduce risk factors obesity, diabetes, cardiovascular disease and cancer. ⁴
- In addition to health benefits, workers who use sit-stand desks have been shown to be more alert, energetic and productive. ⁵

What to look for in a sit-stand desk

Assembly.

Most sit-stand desks on the market require a significant amount of complex user assembly. Invigo desks are fully assembled at our factory in Bradford, Vermont and arrive in plug-and-play condition.

Durability of work surface.

Desk tops receive heavy use. Veneers and laminates are often not up to the task.

Hand Control Unit.

Desks with programmable preset heights can be customized to one or more users personal requirements.

Range of Motion.

Most sit-stand desks have either 2 or 3 lift stages. Three stage desks generally have a greater range of motion.

Breadth of Options.

Choose a deck for the appropriate size, shape and edge profile and select add ons such as drawer, keyboard tray, monitor arm, modesty screen and wire management as necessary.

Motors.

Electronic sit-stand desks generally have single or dual motors. Dual motor desk tend to operate smoother and can accommodate a greater load.

Aesthetics.

While inherently utilitarian in nature, a sit-stand desk can either enhance or detract from any interior environment. A wide range of wood finishes, base colors and decorative elements will allow a personal touch as well as help the desk blend seamlessly into.

Customizing your sit-stand desk

1

Choose Your Size

Invigo desks are available in a wide range of sizes. Consider both the available space and your functional requirements.

26"x48" (2648)	30"x48" (3048)
26"x54" (2654)	30"x54" (3054)
26"x60" (2660)	30"x60" (3060)
26"x66" (2666)	30"x66" (3066)
26"x72" (2672)	30"x72" (3072)

LINEAR OFFICE STORAGE

With a clean, soft-contemporary aesthetic, Linear case pieces provide ample storage and functionality for home or commercial offices and are an ideal complement to our Odin Office and Invigo Sit-Stand desk series.

The Linear Office Storage cases are crafted in solid cherry or solid American black walnut hardwood and Made to Order in several finishes* with a variety of knob or pull options. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

ODIN HOME OFFICE

The Odin Desks are a graceful addition to any workspace, blending a refined modern aesthetic with purposeful functionality. Designed for those who value precision and understated style, Odin strives to inspire clarity, focus and productivity.

The Odin Desks are crafted in solid cherry or American black walnut hardwood and Made to Order in six finishes*. The finish is **GREENGUARD Certified** for low chemical emissions.

*Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

SARAH HOME OFFICE

The popular Sarah Home Office collection includes two desk options along with file, shelving, and organizer options that work together to create a trim, functional workspace. The Sarah desk, featuring a drawer-style keyboard tray, can be extended with a left or right-side return. A separate desktop organizer adds storage space. A smaller secretary desk can be used alone or accompanied by a return. File storage is offered with a lateral or rolling cabinet; both are equipped with anti-tip locks and can function as a printer stand. Bookcases are available in three sizes and feature adjustable shelves. All pieces are available in solid cherry hardwood* and are Made to Order in five finishes** with a variety of knob options. The finish is **GREENGUARD Certified** for low chemical emissions.

*The lateral file and bookcase case sides are laminated with select cherry veneer.

**Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality.

DESIGNERS

Armin Driver is the Design Director for Copeland Furniture. Armin started her education at SNDT University, Mumbai, India where she completed her diploma in Interior Design. Upon graduating from SNDT, she joined Circus Design Studio as a founding partner where she worked on several interior and architectural projects for nine years. In 1998 she moved to Ft. Bragg, California to attend the College of the Redwoods studying fine woodworking under master craftsman James Krenov for two years. She then joined Copeland Furniture and has been with them since then.

Carl Thompson trained and graduated as an Industrial Designer. He has worked for some of the most respected names in modern design including Eliot Noyes, Walter Dorwin Teague, and Henry Dreyfuss. Over the course of his career he has designed a broad range of products with a particular emphasis on aircraft interiors, rapid transit vehicles, and industrial vehicles. In each case, seating is an elementary and important piece. That experience applies to furniture design, a continuing interest.

He believes design is the synthesis of materials, methods, art, and science producing attractive, comfortable, useful objects and furnishings. This approach has led to domestic and international recognition.

Marc Boudreau grew up near the sea on the Quebec eastern coast where he first learned to work with wood in his father's workshop. For reasons he can't quite explain, furniture design has always been a passion.

Throughout his career, Marc has contributed to numerous commercial successes and has received several design awards in recognition of his work. With over 25 years of experience in product design, he spent few years in the industry before establishing his own studio in Quebec City in 2002.

Since then, he has collaborated with various American and Canadian companies to create residential furniture, urban furnishings, and playground equipment.

As a designer, his greatest strength lies in his creativity. He is driven by the pursuit of simple, innovative concepts that align with his clients' philosophies and enhance their brand image.

Jake Hanson was born and raised in Grand Rapids, MI, and started working with local cabinetmakers in high school. He studied at Kendall College of Art and Design, majoring in Furniture Design while taking an assortment of drafting, woodworking, and metalworking classes. He started his career learning to engineer high end furniture, combining his skills from cabinet shops and college courses with large scale wood and upholstery manufacturing. Caring deeply about utilizing the natural beauty of the wood and sustainable practices, he has joined Copeland as a designer and engineer.

THE *BEHAVIOR* OF SOLID WOOD FURNITURE

Wood is dynamic material. Some say that it is still "living" even after it is made into furniture. Unlike composite materials and stone, it is constantly adapting to its environment and actually changing weight, shape and size. For instance, a 42" wide table can change $\frac{3}{8}$ " of an inch in width over the course of a year as the relative humidity in a living space varies with the seasons. Sometimes one surface of a wooden component will receive a different exposure to seasonal changes than the other side and a slight warping or "cupping" might occur. "Cupping" and warping are minimized by engineering the furniture so that wide expanses of hardwood, such as table tops, are stabilized by other components that run across the width of the panel and limit the extent to which the wider panel can move. We also retard variation in moisture content with the application of moisture resistant **Greenguard finishes**. While engineering solutions can limit changes in shape they will never totally eliminate them and some movement is to be expected.

Some interesting facts about solid hardwood furniture and how moisture and humidity effect it:

- 🌿 The hardwoods we use to make furniture have been dried to 6% - 8% moisture content.
- 🌿 The equalized moisture content (EMC) of a typical living environment varies from a low of 4% to a high of 11%.
- 🌿 The range in environment humidity impacts the moisture content of everything in it. For example, when a 42" x 84" Axis Dining Table leaves our factory it weighs 120 lbs. 8 lbs, 6 ounces of that is water.
- 🌿 If exposed over a long enough term to the driest residential environment (heated air in a winter climate) it will lose about 3 1/2 lbs. of water.
- 🌿 Exposed to a high humidity environment (un-air conditioned beach house) it will gain 3 1/2 lbs. It almost never reaches those extremes, because the driest and most humid seasons usually only last for several months and moisture resistant finished retards drying and uptake of moisture.

Think of the cellular structure of wood as bundles of long narrow tubes. As the moisture content of the cells is reduced the tube shrinks in width but not length. With this variation in moisture content, solid wood furniture shrinks, expands and moves. The movement is small and happens slowly and often time it is never noticed. For each 3% change in moisture content of finished wood the width of the wood will change 1% in its width. That means that if we make a table 42" wide out of lumber that is 8% moisture content, and it is left long enough in an environment with 11% EMC, it could expand by $\frac{3}{8}$ " in width. In the other extreme, the change in width would be $\frac{3}{4}$ ".

SOLID WOOD: EXPANSION, CONTRACTION AND SEASONAL CHANGES

Relative humidity in your home vs. Moisture content of wood	
Relative humidity	Moisture content
0%	0%
20%	4%
40%	7%
75%	14%
99%	23-30%
For every 4% change in moisture content, wood changes about 1% in width. Changes in length are negligible.	

Seasonal changes in humidity cause wood to shrink in the winter and expand in the summer. Small changes in dimension and shape are normal and are to be expected.

The science:

Wood is hygroscopic, which means its **moisture content (MC)** will fluctuate based on the **relative humidity (RH)** of the surrounding air. As humidity increases, the MC increases, and the wood expands, and as the humidity decreases, MC decreases, and the wood shrinks. This relationship is referred to as **Equilibrium Moisture Content (EMC)**.

The moisture content of wood is tied directly to the relative humidity of the surrounding air. The higher the relative humidity, the higher the MC of the wood. Furniture delivered into a new environment will take a while to reach its **equilibrium moisture content (EMC)** with the air. In other words, for the wood to acclimate to the humidity level in its new environment, it may take on more moisture or it may dry out. For example, if furniture is made with wood at **6-8% MC** but is exposed to **20% RH**, the wood will dry to 4% MC (and shrink as it dries). If exposed long enough to acclimate to the environment, it could shrink 1%.

How does that impact my furniture?

As an example, an **Exeter Extension Table** is made 111 ½" long. If it is acclimated to a more humid summer environment, it expands to 112" long. In a dryer winter environment it will return to 111 ½"

In addition to small changes in size, changes in the environment will result in small changes in shape. A table leaf may lift slightly at the edge so that it deviates from plane with the adjacent leaf (.020"). A glass placed across the joining line may rock slightly. If slid from one section to another, it may catch or feel like it is going to "trip". This is completely normal and to be expected with solid wood extension tables.

The leaves will expand or contract faster at the ends of the panels. This will result in slightly concave shaped edges in the summer and will show a slight gap in the center of the table (image at left).

In the winter the leaves will shrink at the ends and the edges will be a slightly convex. **Tiny daylight gaps may show at the ends of the leaves. These are normal seasonal changes and are to be expected with solid wood extension tables.**

SELECT HARDWOODS

Copeland selects hardwoods with a long history of sales performance in the North American marketplace. These well established species remain prized and continue to attract top dollar with consumers.

CHERRY

MAPLE

WALNUT

OAK

CHERRY offers superior woodworking characteristics. A strong hardwood with a subtle grain pattern add a uniform texture, its color darkens with exposure to sunlight. It is important to understand that exposure to light accelerates the natural oxidization process. An objects left on a cherry wood surface for an extended period of time may retard the aging process in a limited area. Simply remove the object and, over time, the surface will attain a uniform reddish brown color.

MAPLE is a heavy wood characterized by straight grain or clusters of curls (burls). It is highly resistant to abrasion and indentation and the natural color ranges from cream to light brown.

AMERICAN BLACK WALNUT is a dense wood with a uniform to highly figured grain. The color ranges from light gray-brown to dark purplish-brown. Its rich patina deepens with age.

OAK is a dense wood known for its great strength and hardness. The wood is very resistant to insect and fungal attack because of its high tannin content.

FINISHES AND FINISH OPTIONS

All pieces are finished with a catalyzed lacquer/varnish that resists stains, moisture rings and spots, heat damage (from hot beverages, etc.), and abrasions. Finishes are formulated to meet Kitchen Cabinet Manufacturers Association (KCMA) standards and provides lasting protection.

Standard finish is GREENGUARD Certified: We use a catalyzed sealer and top coat that is **GREENGUARD Certified** for low chemical emissions as the default finish option on all of our products. **GREENGUARD certification** is a testing program of UL (Underwriters Laboratory) focusing on the issue of indoor air quality. Further information about **GREENGUARD certification**, can be found at: <http://www.greenguard.org>

Natural variations in solid wood and hand-applied finishes make each piece unique. Slight grain and finish irregularities as well as subtle differences in stain shades are signs that the furniture has been crafted from solid wood and are considered hallmarks of quality. Products selected in Natural Oak display a variegated range of colors from blonde to light brown.

KNOB AND PULL OPTIONS

A selection of knobs and pulls is available for all Copeland cabinetry and desks.

UPHOLSTERY OPTIONS

Why Sintered Stone?

Manufactured through a high-tech process subjecting natural minerals to extreme heat and pressure, sintered stone achieves a level of strength and resilience that other surface materials struggle to match.

Impact Resistance

Unlike porcelain, ceramic or marble, which can be prone to chipping or cracking under heavy use, sintered stone is highly resistant to impact and mechanical stress. Its durability makes it ideal for high-traffic areas and environments where long-lasting performance is key.

Non-Porous

While natural stone surfaces like marble or granite are porous and can absorb liquids, requiring regular sealing, sintered stone is non-porous. This means it is inherently resistant to liquids, oils, and harsh chemicals, making it far easier to maintain than natural stone or even quartz or porcelain, which can discolor over time. This resistance extends to UV rays, ensuring that sintered stone will not fade or change color when exposed to sunlight, a common issue with other surfaces.

Heat Resistant

Sintered stone can handle extreme temperatures without damage. This makes it an excellent choice for kitchen, dining or other surfaces where temperature fluctuations are common. Additionally, because it is formed under extreme heat, sintered stone does not off-gas or release harmful fumes when exposed to high temperatures, ensuring a safer, healthier environment.

Environmentally Friendly

Natural stone extraction can be resource-intensive, and quartz often contains resins that are derived from petroleum products. Sintered stone is made from natural minerals and does not require the use of synthetic chemicals or adhesives. Additionally, the manufacturing process generates minimal waste, making it a sustainable choice for eco-conscious consumers looking for high-performance surfaces without compromising the planet.

GREEN FURNITURE

COPELAND FURNITURE IS GREEN FURNITURE - Preservation and stewardship are values that run deep in Vermont. We take pride in the quality of the environment and the natural beauty that surrounds us. Here are some of the ways that our environmental values are reflected in each piece of furniture that we make:

WE USE SUSTAINABLY HARVESTED HARDWOODS FROM THE AMERICAN NORTHERN FOREST - The lumber we use comes from the American Northern Forest, much of it within 500 miles of our factory, consuming less energy in transporting raw material to the factory. An independent research study,* commissioned by the American Hardwood Export Council (AHEC) and conducted by a team of international experts confirms that:

U.S. hardwoods derive from legal and well managed forests.

Hardwood procured from anywhere in the hardwood states could be considered Low Risk in all five Forest Stewardship Council (FSC) controlled wood risk categories.

The U.S. hardwood-producing region can be considered low risk for illegal and non-sustainable hardwood sourcing as a result of public and private regulatory and non-regulatory programs.

**The full report can be found at www.ahec-europe.org*

WE WERE AWARDED SILVER EXEMPLARY MEMBERSHIP STATUS BY SUSTAINABLE FURNISHINGS COUNCIL - Copeland Furniture was awarded Silver Exemplary Membership Status by Sustainable Furnishings Council (SFC), joining only a handful of companies to have been awarded this prestigious distinction for proven performance in meeting a range of specific sustainability measures.

RECIPIENT OF THE SAGE AWARD FOR ENVIRONMENTAL EXCELLENCE - Sponsored by the American Home Furnishings Alliance (AHFA), we were the second American furniture manufacturer to receive this prestigious award. The Sage award program was launched to recognize environmental accomplishments within the home furnishings industry. For more information go to www.sageaward.org

STANDARD FINISH IS GREENGUARD CERTIFIED - We use a post-catalyzed conversion varnish that is GREENGUARD certified for low chemical emissions as the standard finish on all of our products. GREENGUARD certification is a testing program of UL (Underwriters Laboratory) focusing on the issue of indoor air quality. Further information about GREENGUARD certification, can be found at: <http://www.greenguard.org>

WE USE CertiPUR-US® CERTIFIED FOAM

CertiPUR-US® comes with Comfort and Confidence. Certified flexible polyurethane foams meet CertiPUR-US® program standards for content, emissions and durability, and are analyzed by independent, accredited testing laboratories.

CertiPUR-US® approved foams are:

- Made without formaldehyde
- Made without ozone depleters
- Made without phthalates regulated by the U.S. Consumer Product Safety Commission
- Made without mercury, lead and other heavy metals
- Low VOC (volatile organic compound) emissions for indoor air quality (less than 0.5 parts per million)
- Screened for relevant chemicals, including flame retardants, that are classified as carcinogens, mutagens or reproductive toxins and are harmful to human health

Administered by a nonprofit organization, CertiPUR-US® is a certification program for flexible polyurethane foam used in bedding and upholstered furniture. For technical criteria and a list of participating companies, visit: www.certipur.us

GREEN FURNITURE

WE PRODUCE RENEWABLE ENERGY - With more than 1,000,000 kWh of solar production and 3,500,000 BTUs of bio-mass heat generation capacity, we generate 95% of our own energy, onsite. Based on figures provided by the EPA's eGRID, our two solar installations offset over 1.5 million pounds of CO2 emissions annually.

WE CREATE DURABLE FURNITURE WITH TIMELESS DESIGNS THAT WILL LAST GENERATIONS - Heirloom-quality furniture has less environmental impact than a piece that will fail or has a "fashion life." As an example of quality design, our Contour bedroom group won the 2014 ASFD (American Society of Furniture Designers) Pinnacle Award for the best new bedroom design. All of our furniture is built using time-tested joinery and construction methods, durable finishes and quality hardware.

WE'RE NOT DONE - While the environmental impact of our factory and the environmental cost of the furniture we build for you is among the lowest, we're not standing still. We've continued to work to reduce VOC (volatile organic compounds) emissions. We've reduced packaging material purchases with the installation of a box making machine that allows us to make only what we need. We recycle all packaging waste and have reduced our reliance on landfill disposal. We heat our building with wood waste from our manufacturing operation further reducing our consumption of oil.
